

Clean Energy for Africa's Future

A smart bottom line decision for your business

Starsight saves you money

Starsight brings you cost-effective renewable electricity and makes your business more energy efficient.

More than just solar generation

With Starsight's smart power management technology, your electricity goes further as does your money.

End-to-end service

We take care of everything: design of a solution tailored to your needs, installation, operations & maintenance, remote monitoring and customer support whenever you need it. We're there for you.

No upfront asset costs

You pay a simple fee once a month. And that's it.

Outsource your power

Power issues are complicated and take up valuable management time. With Starsight, you can forget your power hassles and focus on your core business.

Latest technology

Whether solar panels, battery storage or smart energy management tools, we use the latest and most innovative technology.
